I koden her på siden skal du angive alle forekomster af begreberne i listen herunder, f.eks. ved at skrive de(t) tilhørende bogstav(er):

FN Function name i en function definition
FP Function parameter
FC Function call
FA Function argument

VI Variable Initialisation
V Variable (minus Initialisation)

A Array
NL NodeList

C If-statement (Condition)
L Loop

```javascript
1   // JavaScript Document
2
3   // vis/skjul-funktionen......................................................
4   function vis() {
5       const xtraText = document.querySelector("#read_more");
6
7       if (xtraText.style.display !== "block") {
8           xtraText.style.display = "block";
9           document.querySelector("#show_hide").textContent = "Read Less...";
10      } else {
11          xtraText.style.display = "none";
12          document.querySelector("#show_hide").textContent = "Read More...";
13      }
14  }
15
16  // Billedgalleri............................................................
17  let index = 1;
18
19  const myTimer = setInterval(frem, 2000);
20
